Shakeout - October - Mike KC6MGM*

Other News and Updates:

WARS - Marshall KM6OTF

MACS - Mike KC6MGM

Other business?

Items for next meeting, July,

Adjourn

Tech Class Facility reviews 6/11:

Michael Carroll Visited Coast Hospital, Redwood Room yesterday. It will be great for the Technician class sessions. It will easily seat 20 with chairs and tables, 2 to a table, as it is set up now. There is video conference with camera and large video screen, audio, internet, video projector and screen.

Steve Turner The Ukiah Adventist Hosp room looks great. Can be divided in half for 20 or opened for 40. Both rooms have projector and PA system with robust internet connection. Our host contact Tim will be attending the class.

Event Calendar submission

June 9, 2021

For Immediate Release:

Free Amateur Radio License Class

This free class will cover the FCC test required to obtain a Technician class Amateur Radio license. Amateur radio communication does not rely on PG&E or cell phone technology to successfully communicate. It can be very valuable during an emergency, to maintain contact with family members and to support your community emergency response activities.

The class will be presented weekly, on five Tuesday evenings, from 6:00 - 8:00 pm, July 13 -through August 10, on Zoom and recorded for repeating or viewing at more convenient times. Classroom locations will also be available in Fort Bragg, Ukiah and Willits. Study materials will be provided.

Email Steve at stkj6eif@gmail.com for more information and to register.

This class will be presented by members of the Mendocino County Amateur Radio Communications Service and the Mendocino County Auxiliary Communications Service.

Contact: Steve Turner, KJ6EIF
